

Tunnell Consulting Announces Four New Principals

Life sciences consultancy promotes Kati Abraham, Greg Anthos, Scott, Myers and Kip Wolf as the firm's newest Principals.

KING of PRUSSIA, PA Nov. 28, 2018 Tunnell Consulting, an organization dedicated to solving complex problems for life sciences companies and government agencies, announced that four of its thought leaders have recently been promoted to the position of Principal. All four are seasoned experts with deep industry experience and all have made significant contributions to their respective industry areas as well as to Tunnell's clients.

"In recognition of the significant contributions made by these four individuals we are pleased to announce that we have named Katalin (Kati) Abraham, Greg Anthos, Scott Myers, and Kip Wolf as Principal," said Maryann Gallivan, President & CEO of Tunnell. "All four have made major contributions to Tunnell, to our clients and to the life sciences industry."

Kati Abraham joined Tunnell in January 2017, after a successful career that incorporated high-level positions at Merck, Centocor, GSK and VaxInnate. As a regulatory expert, she has made significant contributions to Tunnell's Life Sciences Practice, working with large and emerging life sciences clients. Kati has also been essential in contributing to the life sciences community, with her participation in Life Sciences PA events, as a judge at Delaware Valley Science Fair (for middle-school and high-school STEM students), and by providing expert advice to startups as a part of the LSPA Startup Stadium events. She has played a major role in representing Tunnell in industry publications, most recently in her article, "Why you should engage with regulatory early in product development," in Pharmaceutical Online.

Greg Anthos joined Tunnell in August 2014 after a successful career at Merck, where he served as an internal operational excellence consultant. His expertise in OPEX, and his recognition among his peers in the industry, has been essential in adding value to his "big pharma" and start-up clients. In addition, he has made significant and ongoing contributions as an author and speaker/presenter, with important thought leadership published in journals including Pharmaceutical Online, which most recently published an article he co-authored with Scott Myers, titled "Using lean strategy to improve efficiency in pharmaceutical QC labs."

Scott Myers joined the firm in January 2015 after heading up a large lab team at Boehringer-Ingelheim, where he was one of Tunnell's clients. As part of the Tunnell Life Sciences team, he has significantly expanded Tunnell's business across multiple core competencies with Tunnell's "big-pharma" and start-up clients. He has also been a prolific author and public speaker as part of Tunnell's thought leadership program, authoring articles in important industry publications such as MassBio, where he co-authored an article titled "Pharmaceutical QC labs gain superior performance and productivity using lean principles," and Pharmaceutical Online where he co-authored the article, "Using lean strategy to improve efficiency in pharmaceutical QC labs."

Also making Principal was Kip Wolf, who joined Tunnell in January 2015 after a successful career as an independent consultant, as well as working within the industry at Merck and Wyeth/Pfizer. He has been essential in growing Tunnell's influence with numerous "big-pharma" and start-up clients, and has led the way

in formalizing the firm's delivery approach and tools. He also spearheaded the firm's involvement with Life Sciences PA, and has been deeply involved in Tunnell's thought leadership program. He authors a bi-monthly column on data integrity and speaks frequently on that topic, and he is the author of "Cheating in the lab: 3 data integrity pitfalls to avoid in laboratory operations," which appeared in Pharmaceutical Online.
